

June 29th, 2026 Public Update on DCICS Activities on the Topic of Capsule B Results

PG&E and Westinghouse debriefed one of the DCISC Members and DCISC consultants in advance of WCAP (Westinghouse Commercial Atomic Power) Diablo Canyon Unit 1 Capsule B Surveillance Program Technical Report submittal to the Nuclear Regulatory Commission (NRC). The WCAP report was subsequently made available to DCISC and is available on the DCISC website, and in the NRC ADAMS Library (nrc.gov/docs/ML2618/ML26180A296.pdf).

Debrief meetings to DCISC will continue for full review of the contents of the WCAP report and of the review processes that led to its generation. Each of the members of the DCISC will continue debrief meetings with PG&E and Westinghouse, as relevant. Fact-finding reports on this topic and any other relevant DCISC reports and reviews will be discussed at the October 20-21, 2026 DCISC public meeting.
